

## **Class of 2013:**

### **Wheels to Water- Access for all at Whiting Park**

The beautiful Whiting Park beach and famous Lake Charlevoix water will now be accessible to all. The installation of Mobimats and a beach and water access Mobichair will provide a safe and reliable pathway to navigate the beach and and enjoy the lake. Access for individuals previously not able to take advantage of the waterfront areas will become a reality.

The Mobimat system will add to enhancements already underway at Whiting Park to increase access, including a canoe and kayak lift system, a boat hoist/transfer chair, and accessible camping sites.

Mobimats improve access to the water for:

- Wheelchairs
- Power Chairs
- Individuals using walkers
- Individuals using canes
- Those not steady walking in deep sand
- Strollers and wagons
